EDS vaporizers have incorporated the latest trends and ensure the requirements for safe and reliable operation.

An international team of engineers from Germany and France successfully completed the task set before them: to develop and implement into serial produc-

tion evaporators with a fully automatic operating principle in the capacity range from 15 to 320 kg/h (bare vaporizers) and up to 1700 kg/h as vaporizer skids.

Dry type of EDS LPG vaporizer are divided in to three groups.

EDS MONO MONOPHASE VAPORIZERS

- 15, 25, 30, and 40 kg/h
- Fully automatic operated dry type vaporizer
- Constant heating temperature control
- Redundant flood protection
- Overheating protection with safety shutdown
- Ready to use immediately after delivery:
- Equipped with filter, pressure gauges, thermometers, ball valves in the inlet and outlet
- 230 V/ 4,5/4,7 kW

EDS TP: INDUSTRIAL VAPORIZERS

- Star in EDS Vaporizer program
